

Getting Started:

- ☐ An Amazon Kindle Account
You can register for one at <https://kindle.amazon.com>
- ☐ An Amazon Kindle device (Kindle, Kindle DX, Kindle Touch, Kindle Fire...etc.) registered to your Kindle Account
- ☐ A personal computer with Internet access (Public Library Internet computers are okay)
- ☐ Wireless Internet connection (for WI-FI enabled Kindle)
- ☐ A San Diego Public Library card and pin number.
Please contact your local branch library if you need to create/update your card or pin number.

Get for Kindle

4. Chose the lending period you wish to checkout the book: 7, 14, or 21 days. Select "Confirm checkout."
5. Click the "Get for Kindle" button. This will open an Amazon Kindle page. You may be required to sign in with your Amazon.com account if you are not already logged in.
6. Select your Kindle device. Click the "Get library book" button to download the book wirelessly to your Kindle. A few books (indicated on the catalog) cannot be transferred wirelessly and you will need to instead click "Download" at this point to download them to another computer and then transfer to the Kindle via USB. Likewise if you have no Wi-Fi connection. See instructions below.

To Transfer Your eBook by USB

In case you do not have access to wireless Internet, or wireless download is not permitted, you can follow these steps to transfer your library eBook to your Kindle.

1. Locate the item you want to transfer from your Amazon Kindle Account.
2. Click on the "Actions..." dropdown beside the book's/personal document's title and select "Download and Transfer via USB."
3. Select the Kindle you will transfer the file to and click the "Download" button. Save the file to a location on your computer that you will be able to locate.
4. Connect your Kindle to your computer. Open the Kindle drive similar to opening an external USB drive. You will see several folders inside, one of which will be named "documents." This is the folder you will move the downloaded file into.
5. Locate the downloaded file and copy it into the documents folder. You can generally copy files by clicking and dragging the file to the folder.
6. Using your computer, eject the Kindle from the computer. After the Kindle is ejected, unplug the USB cable. Your content will appear on the Home screen of your Kindle.
